

## Double rotor type taping machine

# NWT-70

This device is a high-speed taping machine consisting of two transport rotors.

One machine has two rotors, it is possible to arrange and process multiple vision system inspection and electrical property inspections at high speed.

### Basic specifications

Chip size	0603~3225
Weight	About 320kg
Machine size	W1100×D900×H1700
Processing capacity	Max 5,000pcs/min
Power	3-phase 200V 2.0kW
Vacuum air	External vacuum pump included
Compressed air	0.45MPa

### Optional specifications

Vision system inspection function	Max 4 check stations can be installed
Electrical inspection function	Max 3 check stations can be installed
