

Hanging Type Taping Machine

SRT-18H

This is a hanging type taping machine that can handle a wide variety of chips. That performs electrical measurements and 6-side vision system inspection, and then insert the good chips into a carrier tape, and sealing them with a cover tape.

One machine can handle multiple products, so it is compact and No need much space.

Basic specifications

Chip size	0603~6432 (Nozzle PCD=180mm)
Weight	About 450kg
Machine size	W1000×D550×H1600
Processing capacity	Max 1,000pcs/min
Power	3-phase 200V 2.0kVA
Vacuum air	External vacuum pump included
Compressed air	0.45MPa

Optional specifications

Vision system inspection function	Max 6 check stations can be installed
Electrical inspection function	Only 1check stations can be installed
